#### BASIC COMMUNITY PROFILE EXPLANATORY NOTES

IN	ΓR(	חר	uc	TT	ON
TIVE		90	v		VI.

1. The Basic Community Profile provides 32 tables containing key Family census characteristics of persons, families and dwellings for the following geographic levels: CD, SLA, LGA, CED, SED, Uc/L, SSD, SD, S. Dist., Postal Area, Suburb, Section of State, State, Australia. It is based on place of enumeration.

Family income

- 2. Information was collected from the 1996 Census of Population and Housing.
- 3. Each table title in the Community Profile consists of two parts. The first part lists the variables included in the table. The second part describes the table population.

Household

- 4. A glossary of terms and concepts used in the Community Profiles appears below.
- 5. For more information on classifications and Census concepts see the 1996 Census Dictionary (Cat No. 2901.0).

#### **GLOSSARY**

Household income

- Aboriginal and/or Origin
- 6. The 1996 Census was the first census to allow a person's origin to be Torres Strait Islander recorded as both Aboriginal and Torres Strait Islander; prior to this only one or the other could be recorded.

Commonwealth **Electoral Divisions** (CEDs)

7. Some CEDs cross State and Territory boundaries. The implication of this is that State totals derived from CEDs will not equal the official State to Nfd counts. Therefore State totals will not be provided for the BCP at ¢ED level.

Overseas visitor

Employed full-time/ part-time

8. Employed 'full-time' means that the person worked 35 hours or more in all jobs during the week prior to Census night. Employed 'part-time' means that the person worked less than 35 hours in all jobs during the week prior to Census night.

Employed full-time/ part-time (cont'd)

9. For Census purposes, people who stated they were employed, but worked zero hours in the week prior to Census night have been coded Place of 'employed part-time'. enumeration

- 10. A family is defined as two or more persons, one of whom is at le 15 years of age, who are related by blood, marriage (registered or d facto), adoption, step or fostering, and who are usually resident in the same household. Family tables include same sex couples.
- 11. Family income is the sum of the personal incomes of each reside family member aged 15 years and over. Family income is not applicable to non-family households such as group households or lo person households; or to people in non-private dwellings.
- 12. A household is defined as a group of two or more related or unr people who usually reside in the same dwelling, who regard themse as a household, and who make common provision for food or other essentials for living; or a person living in a dwelling who makes provision for his/her own food and other essentials for living, withou combining with any other person.
- 13. For Census purposes, the total number of households is equal to total number of occupied private dwellings.
- 14. Household income is the sum of the personal incomes of each resident household member aged 15 years and over. If any household member did not state their income, or was temporarily absent, household income is not calculated. These households fall into the 'Partial income stated' category.
- 15. Nfd means 'not further defined'.
- 16. In the 1996 Census, overseas visitors were treated differently compared to previous censuses. In 1996, age, sex and registered marital status were the only person variables recorded for overseas whereas in previous censuses, information on all topics at the perso was recorded. For further information please contact the ABS and r a copy of Census Fact Sheet 15.
- 17. The Census count, based on place of enumeration, is a count of person who spent Census night in Australia. People are counted wh they are on Census night, which may not be where they usually live.

#### BASIC COMMUNITY PROFILE EXPLANATORY NOTES (cont'd)

data, and to identify and correct data of unacceptable quality.

Postal Area	18. A Postal Area of CD of Enumeration is formed by aggregating collection districts (CDs) that fall within physical boundaries of a po	-	t'd)
	on a best fit basis. As the name implies, the data are supplied	Random	25. Cells containing small values are randomly adjusted to avoid
	on a place of enumeration basis. This series excludes non-mappal	le Adjustment	releasing information about particular individuals, families or house
	Australia Post postcodes e.g. post office box postcodes, some	•	The effect of random adjustment is statistically insignificant.
	postcodes which are delivery routes which are also covered by oth	er	
	postcodes (a situation which often occurs in rural areas) and some	Respondent error	26. Processing procedures cannot detect or repair all errors made b
	postcodes which, because of the application of the 'best fit' princip	le, do	persons in completing the form, therefore some may remain in final
	not get a CD allocated to them. A listing of alternative postal area		
	allocations is available from ABS offices.	Undercount	27. Although the Census aims to count each person once, there are
			some people who are missed and others who are counted more tha
	19. Some Postal Areas cover CDs in more than one State or Territo	ry	once. A post enumeration survey is conducted soon after the Censu
	boundary. The implication of this is that State totals derived from	Postal	to measure the undercount.
	Areas will not equal the official State total counts. Therefore, State	totals	
	are not provided for the BCP at Postal Area level.	Household Income	28. Due to operational limitations, the family/household income $\mbox{im}_{\parallel}$
		(HIND) and Family	methodology may result in an undercount of the number of families
Table population	20. Table population is a description of what the table is counting.		households in the \$1,500 - \$1,999 range and a balancing overcount
	example, tables containing marital status usually have a table pop		\$2,000 range. No other income ranges are affected. This may also $\epsilon$
	of persons aged 15 years and over. It appears under the table title	the median income estimate if the median falls in either of these rar	
Tenure type	21. In the 1996 Census, the number of categories has increased a	nd now	29. The calculation of median income is based on imputations made
	includes 'being purchased under a rent/buy scheme', 'being occup	ed	from the Survey of Income and Housing Costs, and as such is subjec
	rent free' and 'being occupied under a life tenure scheme'.		sampling error. This is particularly evident if the median falls into th
			highest income range, where the quoted median is a proxy only and
DATA QUALITY	22. The Census is subject to a number of inaccuracies resulting fro		should be regarded with caution.
	errors by respondents or mistakes in collection or processing of th	e data.	
	Some of these are overcome or 'repaired' by careful processing		30. For explanation of these issues and the technical imputation of
	procedures and quality management of the processing itself. The		dollar ranges, please contact the ABS and request a copy of Census
	effect of those that remain is generally slight, although it may be n	nore	Fact Sheet 7 - Income Imputation.
	important for small groups in the population. The main kinds		
	of error to keep in mind are:	Usual Residence	31. A minor processing error has been identified in the variables Us
			Residence Indicator 1 year ago (UAI1P) and Usual Residence Indicato
Partial non-response	· · · · · · · · · · · · · · · · · · ·		years ago (UAI5P). For further information on the nature and extent
	an answer was imputed or derived (often from other information of	n	error, please contact the ABS and request a copy of Census Fact She
	the form). In other cases a 'not stated' code was allocated.		
			32. Further information on data quality will be provided progressive
Processing error	24. While such errors can occur in any processing system, quality		Census Update and in the 1996 Census fact sheets and working pap
	management is used to continuously improve the quality of proces	sed
